

MUKESH GOUD BAIRU

New York City Metropolitan Area | (201) 680-9919 | mukeshbairu41655@gmail.com | [LinkedIn](#)

Summary:

Applied AI/ML Engineer with expertise in natural language processing (NLP), supervised and unsupervised machine learning, and AI-driven business solutions. Strong background in AI/ML model development, productionizing end-to-end AI solutions, and working with stakeholders to drive impactful AI initiatives. I am skilled in Python, TensorFlow, PyTorch, Scikit-learn, Spark, Hive, and SQL. Passionate about developing innovative AI solutions, coaching team members, and collaborating across teams to achieve business goals.

Education:

Stevens Institute of Technology, Hoboken, NJ

09/2023 - 12/2024

Master of Science in Computer Science

GPA: 3.40

Courses: AI, ML, Deep Learning, Big Data Technologies, Web Mining, NLP, DBMS, 3D Computer Vision

National Institute of Technology Silchar, Assam, India

08/2017 – 05/2021

Bachelor of Technology in Computer Science

GPA: 7.12

Skills:

Programming & AI Frameworks: Python, TensorFlow, PyTorch, Keras, Scikit-learn, SQL

Machine Learning & NLP: Supervised, Unsupervised, and Semi-Supervised Learning, NLP Applications, Transformers, BERT, GPT, Text Classification, Named Entity Recognition (NER)

Big Data & Cloud Technologies: Spark, Hive, SQL, Databricks, AWS (S3, SageMaker), GCP (Vertex AI, BigQuery)

AI/ML Deployment: End-to-End ML Pipelines, Model Deployment, MLOps, Hyperparameter Tuning

Collaboration & Leadership: Stakeholder Engagement, AI/ML Research & Development, Team Coaching & Mentorship, Business-Oriented AI Solutions

Work Experience:

Anuta Networks, Bengaluru, India

Applied Machine Learning Engineer

08/2020 – 07/2023

- Developed and deployed AI/ML solutions for business-critical problems, ensuring model scalability and performance.
- Led end-to-end AI/ML model productionization, from research and development to deployment.
- Implemented NLP models for text classification and entity recognition, optimizing financial data analysis pipelines.
- Designed data pipelines using Spark, Hive, and SQL, improving data accessibility and processing efficiency.
- Worked closely with business stakeholders to translate business requirements into AI-driven solutions.
- Mentored junior AI/ML engineers, fostering both personal and professional growth within the team.
- Conducted AI research and experimentation, integrating state-of-the-art ML techniques into production environments.

Projects:

AI-Powered Financial Risk Prediction System

- Developed an AI/ML-driven risk prediction model for financial services, leveraging supervised learning techniques.
- Used PySpark and Hive to process large-scale financial datasets, improving risk assessment accuracy.

End-to-End NLP Pipeline for Financial Document Analysis

- Designed and deployed an NLP-based system for financial text classification and entity recognition.
- Utilized BERT and GPT-based models to extract meaningful insights from structured and unstructured data.

MLOps Pipeline for Scalable AI Deployment

- Built an automated CI/CD pipeline for AI model deployment in production environments.
- Leveraged AWS SageMaker and GCP Vertex AI to streamline ML lifecycle management.

Flight Delay Prediction using Big Data Technologies

- Processed 10M+ flight records using PySpark and trained ML models for accurate departure delay predictions.
- Deployed an optimized Random Forest Classifier & GBT Regressor on GCP Vertex AI for real-time predictions.

Certifications and Licenses:

1. Google Certified:

[Introduction to Generative AI](#)
[Attention Mechanism](#)
[Prompt Design in Vertex AI](#)
[Vector Search and Embeddings](#)

2. [Databricks Certified Associate Spark Developer for Apache Spark 3.0](#)
